about the sickness that's running rampant through C2B. Robert has been in contact with everyone in this pod over the last week, myself included. I am worried that I will contract the virus next, as the jail has not taken any measure to test anyone else within pod C2B, even after the officers on duty have been informed multiple times this week that people were sick and thought it to be covid. This is gross medical negligence by the jail at the least, and I would like to be covid tested, and have the rest of the pod covid tested as well to ensure we are safe. This should not have happened, as we have been living in here together since March, and have not had any issues until this week. Knowing that the jail put me at risk for contracting covid, KNOWING that covid positive officers came on our unit and denying us the right to know and be tested makes me fearful of what else the jail might knowingly cover up. To add this on top of solitary confinement for 22+ hours per day is mental torture.
